Full stack web developer with a background in material science.

Certification from the University of Washington continuing Ed program. Skills in React, Mongo, Express, and typescript with strengths in creating aesthetically pleasing design, teamwork, and thinking outside the box. Given management level responsibilities within months of hiring with current employer, which opened room for the department to take on more projects. Passionate about creating back-end features and tackling the problems that come with them. Excited to provide a purpose and help advance a team. Positioned well to provide a unique angle on technical problems as well as design.

Technical Skills:

- **Libraries and Environment:** React, Typescript, Node.js, Express, jQuery, Handlebars
 - **Programming Languages:** HTML5, JavaScript, and CSS
 - **Databases:** MongoDB, MySQL and Google Firebase.
 - **Tools:** Github, Heroku deployment and AWS.
 - **Other:** Excellent analytical skills with strong attention to detail, great verbal communication skills, an incredibly adaptive person, self-driven to achieve success and learn.
-
